Projects

AI Lead Outreach System - (https://github.com/mogesh-developer/ai_lead.git)

Built an AI-powered lead outreach automation system using React.js and FastAPI. Handles lead processing, automated outreach workflows, and AI-driven content generation for business lead management

AMS Attendance Bot - (https://github.com/mogesh-developer/amc_bot.git)

Developed a Telegram bot using Python, Selenium, and Docker to automate student attendance tracking, subject-wise analytics, and smart notifications with scheduled daily briefings and 75% threshold alerts.

Billing & Inventory Management System - (https://github.com/mogesh-developer/billing_webapp.git)

Developed a full-stack billing application using Flask and MySQL for retail businesses, featuring product inventory tracking, invoice generation, multi-payment support, expense management, and a sales analytics dashboard.

Sethunaachi Nursery — E-Commerce Platform

Built a full-stack e-commerce platform using Next.js 14, TypeScript, and Supabase for a local nursery business, featuring product catalog, shopping cart, user authentication, order management, and local SEO optimization.
